EDUCATION

University of Maryland – College Park   Aug. 2021 – Dec 2024
B.S. in Computer Science (Honors) & Mathematics, Minor: Computational Finance
- **Relevant Coursework:** Advanced Data Structures, Advanced Algorithms, Machine Learning, Real Analysis, Data Science, Game Theory, Computer Systems (C/Unix/Assembly), Discrete Mathematics, Programming Languages (Ruby, OCaml, Rust)

WORK EXPERIENCE

Capital One   College Park, MD
Machine Learning Engineer Intern   June 2024 – Present
- Engineered a user information timeline for fraud detection using **PySpark** on customer data in **AWS S3**, processing over **330+ million daily entries** and improving query speed by **300%** through serialization, caching, and partitioning.

University of Maryland   College Park, MD
Researcher   June 2024 – Present
- Researching efficient tokenization methods for Large Language Models (LLMs) to process arithmetic operations.

University of Maryland   College Park, MD
Teaching Assistant (TA), CMSC351: Algorithms   Aug 2023 – Dec 2023

Raytheon   Arlington, VA
Software Engineering Intern, BBN Technologies   May 2023 - August 2023
- Refactored and enhanced an internal tool by leveraging **CesiumJS** and **Python** to display **100+** satellites and their maneuvers from an **SQLite** database, resulting in novel 3D globe, map, and satellite visualizations.
- Implemented and optimized **Orekit** orbital propagation algorithms in **Python** to generate training data for space-object-collision detection machine learning models to accept covariance matrices for more accurate predictions

Cigna   Bloomfield, CT
Software Engineering Intern   May 2022 - March 2023
- Completed full-stack tickets for myPassport, Cigna's main pharmacy benefit management tool for worker's compensation.
- Led **10+ interns** in the development of 4Sight, an internal web app that provides Cigna employees information on in-person attendance. 4Sight **increases employee retention** rate and promotes community amongst employees.

University of Maryland   College Park, MD
Researcher   June 2020 - Aug 2020, June 2021 - Nov 2021
- Quantified gender and institutional bias in the conference paper review process using a web-scraped dataset of over **8000+** papers utilizing the **OpenReview API**, **Selenium**, Monte Carlo simulations, and logistic regressions.
- Co-first-authored a highly impactful paper that was presented at the **ICLR 2021 townhall** and selected as a **lightning talk** at the **NeurIPS 2020** Workshop on Navigating the Broader Impacts of AI Research. Papers and talks analyzed and quantified disparities in the review process based on factors such as gender, institutional affiliation, etc.

PROJECTS

CityWorks (Element Solutions, Co-Op Spring 2022) | *AWS, Spring Boot, React, and MariaDB*
- Successfully worked in a team of **6+ engineers** using **agile scrum** to create a full stack application using **React**, **AWS**, and **MySQL** to allow **hundreds of citizens** to request various social services (e.g trash pick up)..
- Designed the database schema and developed **RESTful API** endpoints using **Spring Boot** in **Java** for MySQL.

WebPoint Portfolio | *HTML, CSS, Pug, SCSS, JavaScript*
- Founded WebPoint, a volunteer organization that developed **5** websites for local enterprises, receiving **100+** views per week.
- Spearheaded a tech team of **9+ engineers** to conceptualize, design, and implement all website features, including an in-browser text editing tool, allowing administrators to edit their website without technical understanding.

SKILLS

- **Languages:** Python, Java, C/C++/C#, JavaScript, SQL, MATLAB, SASS, OCaml, Ruby, Rust, Assembly (MIPS), LaTeX
- **Frameworks/Libraries:** PySpark, Pandas, NumPy, TensorFlow, Scikit Learn, Pytorch, Flask, NodeJS, React, Springboot
- **Tools & Technologies:** Git, Postman, Docker, Jira, Confluence, Maven, MS Office/GSuite
